Statement from Concerned Ethiopians

Concerned Ethiopians (CE) is conceived and formed by ‘concerned Ethiopians’ to contribute to constructive public dialogue and discourse.

Ethiopians as a society, can benefit from their intellectual, social and material resources to create sustainable peace and security which in turn leads on a path of self-reliant development and transformation.

Concerned Ethiopians will exert genuine effort to address the gap in direct citizens-government dialogue, truthful understanding and accountability between citizens and their government.

It will also strive to help fill the gap in the government's efforts in information dissemination, public relations internationally, as well as facilitate in strengthening bilateral collaboration.

In addition, CE will work with civil society groups inside and outside of Ethiopia, to promote truthful and positive images of Ethiopia and to counter falsehoods and anti-Ethiopia propaganda by the country's detractors.
